Unity.Mathematics.bounds.encapsulate

Unity.Mathematics.bounds.
IntersectRayAABB

Unity.Mathematics.bounds.intersects

Unity.Mathematics.bounds.bounds

```
graph LR; A[Unity.Mathematics.bounds.closestpoint] --> D[Unity.Mathematics.bounds.bounds]; B[Unity.Mathematics.bounds.encapsulate] --> D; C[Unity.Mathematics.bounds.IntersectRayAABB] --> D; E[Unity.Mathematics.bounds.intersects] --> D;
```

The diagram illustrates a central class, `Unity.Mathematics.bounds.bounds`, which is highlighted in a dark gray box. Four other classes, each in a white box with a black border, point to this central class via blue arrows. The classes are arranged vertically on the left: `Unity.Mathematics.bounds.closestpoint` (top), `Unity.Mathematics.bounds.encapsulate`, `Unity.Mathematics.bounds.IntersectRayAABB`, and `Unity.Mathematics.bounds.intersects` (bottom). The arrows indicate that these four classes are subclasses or related to the central `bounds` class.
